

Blackbaud Award Management™

Blackbaud Award Management serves as a catalyst to create an organised awarding and stewardship process, revolutionise donor stewardship and improve student access to awards.

Create organised awarding and stewardship processes

Allow everyone involved in awards to work from a single platform that seamlessly integrates with your student information system and donor CRM. Flexible user permissions provide access to information while keeping student data protected. With access to view all scholarship recipients it's easy to complete institution-wide audits for fund utilisation and compliance.

Revolutionise donor stewardship

Make it easy for students to submit donor thank you letters and updates as part of their award acceptance process, and provide them with the tools to write meaningful acknowledgements. Feature each donor with their own online profile page containing any information they wish to share. With Donor Reporting we integrate with your Development Office's CRM to combine donor contact information and beneficiary information for both scholarship and non-scholarship funds, creating one unified database to complete the donor reporting process.

Improve student access to awards

A single website makes it easy to promote all awards, bursaries, scholarships and prizes across your institution to your current and prospective student population. Every current or prospective student receives a unique view of awards that they are most qualified for, no matter who is making the awarding decisions. Our integration with your student information system shortens the time it takes to complete applications and improves the quality and accuracy of data on each application.

- Streamline the awarding process for scholarships, hardship awards, prizes and bursaries
- Make it easy for students to discover, apply for and accept awards
- Increase the number of award applicants
- Simple and proven data integration with your Student Information System and Raiser's Edge NXT
- Identify qualified students to award
- Simplify the application reviewing process
- Enhance donor stewardship efforts
