FIMS 14.42: Enhancements

The following enhancements are included in this release.

DonorCentral Support

FIMS 14.42 has been enhanced to work with DonorCentral that is being released.

FIMS 14.42: Resolved Issues

The following issues are resolved in this release. We have provided the case numbers for internal referencing along with a description of the issue.

ID	Module	Description
14843	GL	Fixed descriptions being truncated on the G/L Segment Report after 16 characters even though much longer descriptions could be entered.
17039	Grants	Fixed missing Condition Code Lookup in the Grants Conditions super-tab for selection criteria on Condition Code.
18839	DC	Real Time Sync (RTS) will now be turned off for the second database during the upgrade.
18104	DC	Fixed updated Pledges with "In Honor of" selected that caused issues with the DonorCentral Upload. It, also, caused FIMS to lockup during Pledge Posting and during the updating of Pledge History when RTS was turned on.
19463	FACTS	Fixed Unpost not allowing the user to unpost when selecting multiple cycles unless the most current cycle was in the Pool's first fiscal year. Unpost now allows selecting multiple cycles when all of those cycles are in the same fiscal year.
19340	Grants	Fixed Tax Status 1 and 2 to no longer populate backwards in Applications when using Tax Status Verify.
19705	DC	Fixed the issue where Organizations tagged to be uploaded to DonorCentral were not being uploaded through the Real Time Sync..
18841	DC & Grants	Improved search in Grantee Import/Create, from DonorCentral, and Tax Status Lookup for grantees and profiles in FIMS. This includes an improved user interface.
