Upgrade Information

IGAM/Online Applications 6.0 is compatible with the following MicroEdge product versions or later: GIFTS 6.6, GIFTS Alta 1.7, and GIFTS Online 5.2.

Upgrading to IGAM 6.0

GIFTS Online users who currently have Online Applications will be upgraded with their scheduled GIFTS Online 5.2 upgrade.

GIFTS 6.x and GIFTS Alta 1.x users, please note you will need to also upgrade your GIFTS or GIFTS Alta installations to the latest version to be compatible.

Please send a request to upgrade_inquiry@microedge.com, noting your current GIFTS or GIFTS Alta version. The process general takes 3-5 days.

Technical Preparation

For Internet Explorer Users:

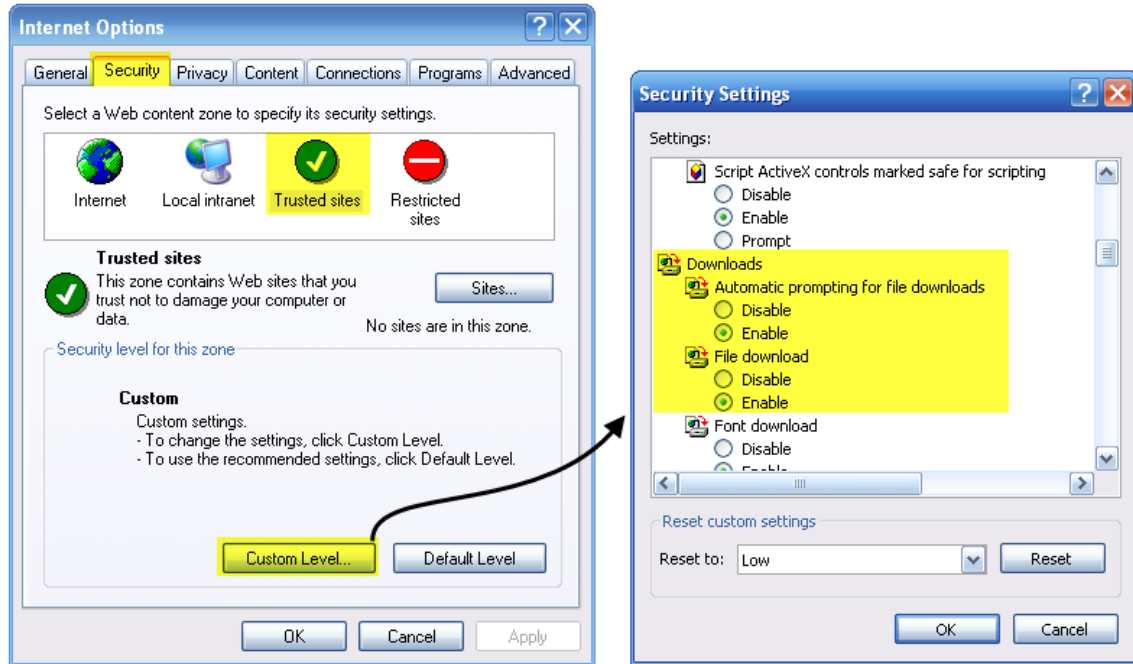

Setup/Verify Pop-up and Security Settings

If using Internet Explorer, please make sure the following steps are taken:

1. Add your site to list of **Allowed Sites** in Pop-up Blocker. (Tools > Pop-up Blocker > Pop-up Blocker Settings..)
2. Add your site to your browser's list of **Trusted Sites**. (Tools > Internet Options > Security > Trusted Sites > Sites button)
3. With Trusted Sites icon selected, click the **Custom Level** button and scroll down to the Downloads section.
 - For IE 8 only, make sure the **Automatic prompting for downloads** option is Enabled.
 - For IE 8/9/10, make sure the **File Download** option is Enabled.

NOTE: The above download settings are enabled by default but may have been disabled as part of your organization's security policy.

NOTE: If you do not see the Security tab or are unable to access the above settings, please contact your organization's Technical Support/Helpdesk for assistance. Due to your organization's computer security policy, you may not have been given permission to make these changes.

Clearing Your Browser Cache

If you use Internet Explorer, it is required to do the following prior to logging in to GIFTS Online 4.0 for the first time:

1. In **Tools->Internet Options**, delete browsing history. This should include temporary internet files and cookies.
2. Use the F12 key to open the developer mode. Then, in the Cache menu, select **Clear Browser Cache**. Once done, use the F12 key to close.
3. Close Internet Explorer completely and make sure no instances of Internet Explorer are running. This can be checked by looking for the process iexplore.exe in the Windows Task Manager and ending it if necessary once Internet Explorer has been closed.

For Firefox Users: Verify you are using version 25 or later

If you use Mozilla Firefox, make sure that you are updated to version 25 or later. It includes important fixes required for accessing GIFTS Online. Your Firefox should update automatically, but to see which version of Firefox you are using, go to **Help->About Firefox**.

*Other compatible browsers will not require the above steps.

Logging In After an Upgrade

GIFTS Online users; please note the login process may take slightly longer when first logging in after an upgrade. Subsequent logins will not have this delay.

Technical Support

Need Help or Have Questions?

If you have questions or need assistance in any way, please contact MicroEdge Technical Support in any of the following ways:

Support Hours: M-F, 8:00 am – 8:00 pm ET

GIFTS, GIFTS Alta, and GIFTS Online Users:

Phone: 877.704.3343

Email: helpdesk@microedge.com

FIMS and FIMS Host*Net Users:

Phone: 800.256.7772

Email: FIMSupport@microedge.com

Get Help Online: Go to www.Microedge.com and login to PowerME. Click the **Cases** link at the top of the homepage and click the **Create New Case** button.

New Features for IGAM 6.0

Requests and Requirements Resubmission

NOTE: This feature is only available to clients with the IGAM module.

GIFTS users can now send back an application or a requirement that was submitted online to allow the grantee to make changes and resubmit back into GIFTS. The Resubmission process can be initiated while considering an application or from the Request or Requirement form within GIFTS. Publishing a resubmission will notify the grantee of the action.

The applicant cannot initiate the resubmission. It must be requested by the grantmaker first.

Initiating Resubmissions

There are two ways of initiating a resubmission request:

- During the Consider process, an IGAM user can check the **Generate Resubmission** box.
- A GIFTS user can also click the **Publish Resubmission** option in the Actions menu when viewing an open Request or Requirement record.

From IGAM

When a user is considering applications or requirements submitted online, there will be a new 'Generate Resubmission' option available to them provided that there is an email address associated with the applicant. This will allow the user to send a message back to the applicant as part of the consider process. The application or requirement will still upload into GIFTS.

Consider Application [6]

Organization / Applicant: GuideStar USA, Inc.

Request Information:

Type: Cash Grants

Status: <None>

Staff assigned to Request: Admin

Meeting Date: / /

Generate Correspondence

Generate Resubmission

OK Cancel

NOTE: If the highlighted record does not have an associated email attached, this checkbox will be grayed out/disabled.

When the user Considers the application with the 'Generate Resubmission' check box a form will open to allow them to customize a message to the applicant. This message will be included in an email that will automatically send to the applicant as well as be displayed when they open the resubmission application or requirement when logged into the IGAM site.

Application Resubmission

You have chosen to republish this application for resubmission. The applicant will receive the following message upon opening this application:

[This application has been sent back for resubmission. Please make any suggested changes to this application and resubmit the application for review.]

OK Cancel

The default text message in the Text box can be changed in the IGAM Form Designer.

“This application has been sent back for resubmission. Please make any suggested changes to this application and resubmit the application for review.”

Processing the Resubmission

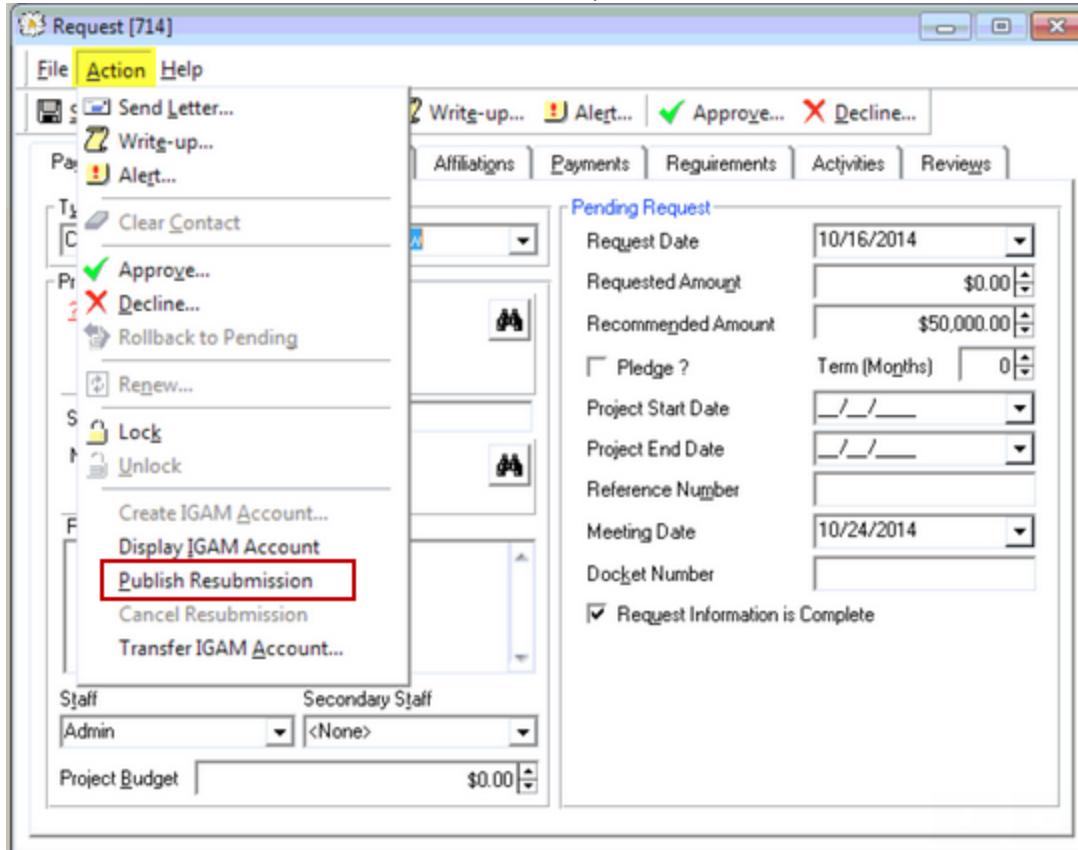

After clicking **OK**, the following occurs:

- For applications that have an account, a new application will be created on the server and associated with it.
 - The new application will be an editable copy of the selected one.
 - It will not matter if the original app’s Form is inactive.
 - If the Form has been modified, these changes will not be reflected in the new application.
 - If the Form had a quiz or any authentication options (IRS lookup, Form Password), they will be removed/ignored.
 - All data that was on the original application will default to the new application:
 - Editable fields remain editable.
 - Read-only & hidden fields remain read-only & hidden.
 - The attachments from the original application will be ignored.
- The original application will be moved to the “View Historical Applications” folder.
 - Its Disposition will display “Requested Resubmission”
 - A new value for the Resubmission Requested Date will be stored and displayed in the grid
 - A request will be created in GIFTS
- A process monitor (batch) or a message box (single) will confirm the successful completion of this process:
 - A resubmission has been requested for Application [Server Side ID].*
 - If the process was done in batch, and one or more apps did not have an account, this will be reported in the process monitor as well.
 - A resubmission cannot be requested for Application [Server ID] because there is no account associated with it.*

From Requests

A Resubmission action will be available in the Request > Action menu in GIFTS.

The process will be the same as described during the Retrieval/Consider process except:

- If one of the following conditions is true, the resubmission action will not take place:
 - Request is declined.
 - Request has an open Stage 2.
 - Request is approved.
 - Request is not associated with an IGAM account.
- If the user chooses to publish for resubmission during the consider process, the **Generate Stage 2** button will become grayed out/disabled.
- If there is an open application for resubmission, the **Generate Stage 2** action will be grayed out.
- GIFTS will determine which application is the most recently considered for that request, and use it to copy.
- An Activity record will be created and attached to the Request. This will be a type of history activity for “Resubmission Requested”. It will have the following properties:

Field	Value
Organization ID	Organization for the Request.
Contact ID	Primary Contact for the Request
Request ID	Current Request
Staff ID	The user logged in to GIFTS who performed the Action.
Done User ID	Same as Staff
Done Flag	Yes
Class	History
Type	Resubmission Requested
Due Date	Current Date
Done Date	Current Date
Notes	Resubmission requested for Application [Server ID]. A new Application [new Server ID] has been created.
Change User	User logged into GIFTS who performed the action.
Change Date	Current Date
Branch	Branch ID of the Request, if Branch Security configuration.

From Requirements

The same Resubmission action will be available in the Requirement > Action menu in GIFTS.

- If one of the following conditions is true, the resubmission action will not take place:
 - The Requirement has been flagged as done.
 - Requirement has an existing published requirement.
 - Requirement has an existing resubmission request.
- GIFTS will need to determine which application is the most recently considered for that requirement, and use it to copy.
- An Activity record will be created and attached to the Requirement. This will be a type of history activity for “Resubmission Requested”. It will have the following properties:

Field	Value
Organization ID	Organization for the Requirement.
Contact ID	Primary Contact for the Requirement
Requirement ID	Current Requirement

Field	Value
Staff ID	The user logged in to GIFTS who performed the Action.
Done User ID	Same as Staff
Done Flag	Yes
Class	History
Type	Resubmission Requested
Due Date	Current Date
Done Date	Current Date
Notes	Resubmission requested for Requirement [Requirement ID]. A new Application [new Server ID] has been created.
Change User	User logged into GIFTS who performed the action.
Change Date	Current Date
Branch	Branch ID of the Request, if Branch Security configuration.

Changes to Active Form/Deactivation

Currently, when making changes to an Active form, or deactivating a form, the user is asked whether to allow any in-progress applications to be submitted. This function does not apply to resubmission applications.

If the user wishes to remove the resubmission application, they must use the “Cancel Resubmission” action available in “View Historical Applications” or Request/Requirement record.

The same logic is applied for Automatic Deactivation.

Notifying Applicants

In addition to the instructional text placed on page 1 of the copied resubmission application, the user will be presented with an option to generate correspondence when using the resubmission action.

Cancel Resubmission

After requesting a resubmission, there will be an option in the “View Historical Applications” Action menu to “Cancel Resubmission”. This action will be available for both Requests and Requirements where a resubmission application has been published.

The Cancel Resubmission option is also available in the Actions menu in GIFTS when viewing the Request or Requirement record. This action will be grayed out/disabled if the highlighted record (single record only) does not have a resubmission requested.

NOTE: When canceling a resubmission from GIFTS, an extra check is done to make sure that the resubmitted application does not already exist as a Pending Application, in addition to not being submitted. If it does, an error will occur stating, “Resubmission application could not be canceled. Application has already been submitted”.

When the action is selected, a form will launch where the user can customize a message for the applicant. The default text is stored on the server and can be changed in the messages section of the global form design.

- **Instructional Text**

You have chosen to cancel the resubmission request. Applicants who attempt to access their Form will receive the following message instead:

- **Text box** (vertical scroll only). Initially, the default text will be as defined below; however, the text the user last entered will be remembered.

This form is no longer available for online submission. We apologize for the inconvenience.

- **OK/Cancel** command

Retrieval & Workspace Changes

Both the Pending & History folders of IGAM will display a Resubmission column.

The Resubmission Requested Date will be available as a column in the History folder only.

Linking Resubmissions

Linked Organizations and Contacts will not carry over from the previous application, and the user will be asked to relink. Only the Request ID will carry over.

Considering Resubmissions

Since there is a Request ID associated with the Resubmission, the Request data will be updated with the data from the resubmission.

Requirements, upon retrieval, will be updated with the data from the resubmission.

Considerations for Application Transfer

When pushing for resubmission, the application will be pushed to the applicant associated with the latest submission.

Simplify for Online Applicants

NOTE: The Simplify database contains profiles of organizations that are registered as tax-exempt organizations with the IRS and requires an annual subscription to Guidestar.

What is Simplify?

Project Simplify grew out of recommendations from the Grants Managers Network's Project Streamline, which found that grantseekers wrestle with application and reporting practices that often are disproportionately burdensome. The main finding was that applicants fill out numerous applications for funding requests and have to re-key the same commonly asked fields in each application, often taking the applicant organization endless amounts of time.

Most applications include the same core elements, such as organizational data, contact information, a board of directors list, financial statements, and so on. Project Simplify is a *Data-sharing* and *Standards-setting* process that helps funders more easily access this frequently used information from grantees. *Standards-setting* creates a consistent format for core organizational information. *Data-sharing* happens through the GuideStar Exchange database, which already connects nonprofits with current and potential supporters. Nonprofits enter their core information once, and then it is automatically added to every grant application they complete for any participating funder. The service is provided at no cost to the nonprofits (grant applicant / grant recipient), however all funders must pay GuideStar an annual fee of \$750 in order to access GuideStar Exchange data.

Introducing the ability to pull Guidestar Exchange data into applications through Simplify provides funders with the ability to have their applicants auto-populate their application forms.

How does Simplify work?

Applicants often apply for funding from multiple organizations. When they are filling out online applications they often have to re-enter standard information such as Name, Address, City, State, Tax ID, Contact information over and over again for each unique application they are filling out.

All nonprofits now can fill out a standard organizational profile on GuideStar's Exchange database (Project Simplify). For online applications that participate in the GuideStar Exchange database sync (Project Simplify), the applicant will be able to pull in their GuideStar Exchange database (Project Simplify) profile information and automatically fill in the matching fields on the application.

How do I enable Simplify for my online application forms?

To enable Simplify for your GIFTS site, please contact MicroEdge Services at Services@Microedge.com.

Once enabled for your site, to enable Simplify on an application form the "Require applicants to enter U.S. Tax ID" option has to be checked in the application form setup **Properties**. If it is not checked, a Tax ID request will not be displayed to the applicant.

The entry of the applicant's Tax ID will, in turn, enable Simplify to pull data from the Guidestar Data Exchange.

How does this change how online applications work?

With Simplify turned on, applicants will be given the option to identify their organization with an EIN number when filling out an application form and have up to date information from the Guidestar Exchange Database auto-populate corresponding fields in the form.

This will not only save time for applicants, but will also ensure that the data is accurate and up to date.

How will it look to an applicant?

With Simplify turned on, applicants will be prompted to enter their Organization's Tax ID before the application form is opened. This prompt is identical to the window that comes up for an application form when Requiring Tax ID, except with a few extra items to accommodate Simplify.

NOTE: This prompt will not occur for Stage 2 application forms.

Keep in mind that not all applicants that arrive at this application will be Simplify members, and therefore will not have any Exchange Data saved with GuideStar. For this reason, there are multiple options when arriving at this window to accommodate different types of users/applicants.

Simplify Logo and Link

With Simplify on, below the Tax ID field will be the Simplify logo and a link to a site where applicants can learn more about Simplify.

Please enter your Tax ID:

Powered by  Less process. More purpose. [Not a Member of Simplify? Click here to learn more](#)

NOTE: The 'Powered by' text before the Simplify logo will initially also be supported in French and Spanish.

Procedure and Validation Rules:

- The applicant cannot skip the step to enter a Tax ID before beginning the application form.
- If the "Require Tax ID to be on file in the IRS database" option is also checked, this check will occur before the Simplify request gets sent (to make sure that the Tax ID is on the IRS database).

- If the Tax ID entered is not on the IRS database, an error message will appear.

The Tax ID that you entered was not found in the IRS database. We cannot accept applications from organizations whose tax information is not on file.

Please enter your Tax ID:

- If the Tax ID entered is on the IRS database, the system will proceed to check if the Tax ID is on the GuideStar Exchange database.

- If the Tax ID is valid, the applicant will be taken to the Eligibility Quiz, if it exists.
- If there is no Eligibility Quiz, the applicant will be taken directly to the application form where data from the GuideStar Exchange and IRS BMF will have been filled in.
- If the “Require Tax ID to be on file in the IRS database” option is not checked, and the Tax ID entered is on the IRS BMF or GuideStar Exchange database, the system will continue to the eligibility quiz (if required), or go straight to the application form and pull in the pertinent exchange data as well as IRS BMF data IF available.
 - If the Tax ID is not found, an error message will appear.
 - Clicking **OK** without modifying the Tax ID will take the applicant to the quiz or application form. The fields on the application will need to be entered manually.
 - Clicking **OK** after changing the Tax ID will cause the system to recheck the Tax ID.
- Simplify data will take precedence over data found in the IRS BMF.
- A simplify logo will be displayed at the top left of an application form that has been successfully populated with exchange data.
- If a field being filled with exchange data is on the application more than once, fill all like fields with the same data.
- Simplify fields must be present on the application form to be populated, but may be hidden.
- Any fields filled in by Simplify can be overwritten by the applicant if needed.

How do GuideStar Exchange fields match up with GIFTS and GIFTS fields?

The following tables list the fields available through GuideStar Exchange, along with their matching field in the GIFTS or GIFTS database.

NOTE: Fields listed in Purple do not exist in the standard GIFTS and GIFTS database. Clients will have to create custom fields using the GIFTS Customizer or Blueprint module with the specifications included in order to match the fields in the Simplify database.

Organization Fields

GuideStar Field	Field in GIFTS/Online Database
EIN	Tax ID
Organization Name	Name
Also Known As (AKA)	a.k.a.
Doing Business As (DBA) name	Record Type: Organization Field Name: Doing_Business_As Standard Label: Doing Business As Type: Text Maximum: 50
Formerly Known As (FKA) name	Record Type: Organization Field Name: Formerly_Known_As Standard Label: Formerly Known As Type: Text Maximum: Long Text
Government Registered Name	Legal Name
Government Issued Ruling Year (The year the recognizing government registered this organization as a nonprofit.)	Record Type: Organization Field Name: Government_issued_ruling_year Standard Label: Government Issued Ruling Year Type: Long Number, No Decimal
Reason for Nonprivate Foundation Status	Record Type: Organization Field Name: Reason_for_Nonprivate_Foundation_Status Standard Label: Reason for Nonprivate Foundation Status Type: Long Text
Incorporation year	Record Type: Organization Field Name: Incorporation_Year Standard Label: Incorporation Year Type: Long Number, No Decimal
Mission Statement	Record Type: Organization Field Name: Mission_Statement Standard Label: Mission Statement Type: Long Text
Geographic Areas Served Narrative	Record Type: Organization Field Name: geographic_areas_served_narrative Standard Label: geographic areas served narrative Type: Long Text

GuideStar Field	Field in GIFTS/Online Database
Impact Statement	Record Type: Organization Field Name: Impact_Statement Standard Label: Impact Statement Type: Long Text
CEO Comments (Text provided by the NPO explaining, from the NPO's CEO's perspective, the mission, activities, and impact of the NPO.)	Record Type: Organization Field Name: CEO_Comments Standard Label: CEO Comments Type: Long Text
Funding Sources	Record Type: Organization Field Name: Funding_Sources Standard Label: Funding Sources Type: Long Text

End Month	To
Email Address	E-mail
Compensation	Record Type: Contact Field Name: Compensation Standard Label: Compensation Type: Currency
Bio	Record Type: Contact Field Name: Bio Standard Label: Bio Type: Long Text
Primary Phone	Phone

Update to UTF-8 Character Encoding

In order to bring IGAM up to modern international standards, it has been updated to support UTF-8 browser character encoding which is the world standard for representing all languages.

Please note that GIFTS does not support UTF-8 and certain international characters may not appear as entered on IGAM application/requirement forms.

Known Issues Fixed in IGAM 6.0

The following **IGAM known issues** have been fixed in this IGAM 6.0 release:

ID	Title
271002	Resolved issue with missing IGAM application if the backup fails, and the write/update to the original fails.
288353	Client was getting error when considering a IGAM application "Cannot insert duplicate key row in object "dbo.Contact_Ext'.
286498	IGAM deactivation message truncated and defaulted to system/default message if longer than 255 chars.
210119	Client's IGAM application CONTACT links were updating Contacts without checking the "update GIFTS" option when linking.
252962	Contact custom boolean fields were ignored when set to Required.
253455	Groups of fields in IGAM forms caused the Title of the group to appear twice to the applicant if the groups started with a hidden field.
276469	Non US clients were not able to utilize the Deactivation Date when creating a new form.
281386	Requirement Forms - code percentage fields were not populating from GIFTS Values.
284838	IGAM Application XML became out of sync with actual attachment files.
273407	Client reported that the # attachments column in the submitted applications report did not count attachment field attachments.
274084	Currency fields failed to render label correctly if not filled in when field was marked as Required.
210119	Links were updating Contacts without the user checking the "Update GIFTS" option when linking.
277802	Default Forgot Password text needed to be changed to match button.
279876	Contacts were not updating properly when linked from IGAM.
278655	Attach application feature with email application was not consistent/did not work.
279667	Client reported that when filling out the IGAM login with email and password -> ENTER takes you to create an account when New Applicant is a button instead of link.
289752, 264947	Resolved issue with user being able to Submit or Save and Finish later when previewing application forms.
27200	Resolved issue with no Form Title, Stage 1 Form, or Stage 2 form options being

	available when Sorting.
278655	Client reported that the attach application check box did not function.
279667	If the New Applicant link was set to button, it would be the focus when hitting the Enter key.
287935	When using Safari for submitting an IGAM application, dates were displaying only in US date format (mm/dd/yyyy) even though Regional Settings and related date settings were set to UK.
288285	Code percentage was not enforced, allowing submission when validation should prevent
288559	With Oracle backend, Applications.Country value >20 chars did not truncate which caused insertion into Applications to fail.
287879, 288020, 288614	IGAM retrieval did not recognize file with same name as in application xml.
286069	Error when linking organization if the Org name contained brackets and a space.
288879	Resolved issue with incorrect Account URL populating the Account URL merge field.
282968	Resolved issue with error handling in Attachments.
289419	Hidden fields were not hidden when there was a field to the right of it.
288597	Chrome input fields extended past frame on Account Login.
