

Minimum System Requirements

This document lists the required system infrastructure to run your Blackbaud system. Blackbaud recommends the purchase of top-of-the-line equipment when possible and that organizations budget for continual upgrades to their system. Please note that minimum system requirements are subject to change, so make sure you have the latest information before making any purchases.

In addition to the following minimum requirements, Blackbaud strongly recommends the purchase and scheduled use of a tape or archival backup solution.

Contact Blackbaud Support for a FundWare 7.6 Registration Key

Fundware 7.60 Terminal Server - Professional

Windows Server minimum requirements

Supported Operating Systems	<ul style="list-style-type: none"> ◆ Windows Server 2003 Standard. SP2 or higher is required ◆ Windows Server 2008 Standard ◆ Blackbaud does support FundWare on a Virtual Server <p>Note: Blackbaud does NOT support Client / Server Environments Note: Blackbaud does NOT support the use of x64Bit Operating Systems Note: Blackbaud does NOT support the non-Windows Operating Systems Note: Blackbaud does NOT support FundWare installed on Domain Controllers</p>
